

Sale of the Isoboard® Extruded Polystyrene Business in Australia and New Zealand to Australian Urethane & Styrene Pty Ltd (AU&S)

We are pleased to announce that with effect from 1st July 2008, the Directors of ACR International Co Pty Ltd have successfully negotiated the sale of the Isoboard® Extruded Polystyrene Business in Australia and New Zealand to Australian Urethane & Styrene Pty Ltd.

This means for all future business regarding the sale of Isoboard® in Australia and New Zealand, Australian Urethane & Styrene Pty Ltd will now provide you with the same friendly, efficient service to which you have become accustomed as a valued customer of ACR International.

ACR International would like to take this opportunity to thank all our customers for their continued support and we are confident we have left you in most capable hands to continue mutually beneficial relationship.

The Directors of ACR, Ian and Carol Martin and General Manager John Mason have offered their services on a consultancy basis for the next few months to assist in a smooth transition.

ISOBOARD® is a rigid extruded polystyrene board used for thermal insulation. It is manufactured by a fully automated extrusion process to meet international specifications and standards. ISOBOARD® extruded polystyrene has a closed cell structure, giving it a range of properties very different from standard expanded polystyrene (EPS)

Advantages of Isoboards

- High resistance to heat flow (i.e. low thermal conductivity);
- High resistance to water vapour diffusion and water absorbability;
- Uniform density distribution for dimensional stability;
- High compressive strength;
- Fire resistance (a fire retardant is added);
- Ageing resistance (ISOBOARD'S properties are retained over time);
- Resistance to bacteria and micro-organism growth;
- Ecologically friendly (no CFC's are used in manufacture);

For all your Isoboard and Insulation Foam requirements, please contact any one of our team, Craig Sherry (Sales Manager), Bill Baini (Victorian Manager) James Pace (Customer Service Representative) and Duncan Herbert (Sales and Technical Service) through the following contact numbers:
